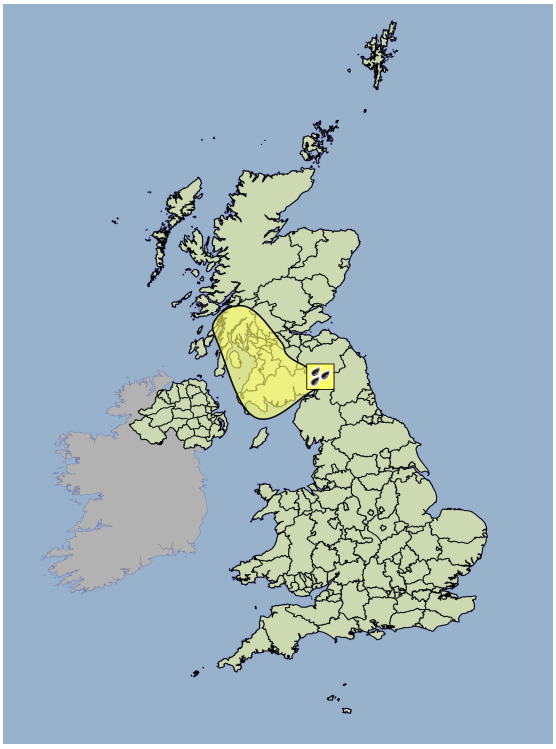
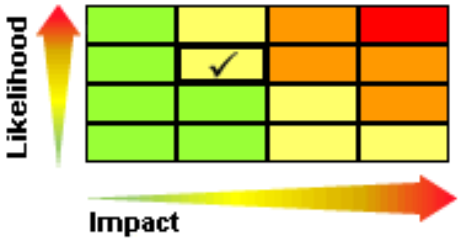
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will move northeast across the area on Wednesday. Another 10-15 mm is likely to fall within a 6-hour period, with 20 mm possible locally. While these totals are not particularly large, further heavy rain during the morning rush hour could well bring some tricky driving conditions and a good deal of surface water.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Wed, 18th Nov 2015** until **12:00 on Wed, 18th Nov 2015**

Another area of rain is expected to cross the UK from the southwest on Wednesday morning. This will move through fairly quickly but as it does so some heavy rainfall is likely, this falling on ground already saturated following the recent wet weather.

Please be aware of likely difficult driving conditions and the potential for minor travel disruption due to surface water flooding.
